DETAILED ACTION

1. Claims 1-14 are pending in this communication filed 02/09/01.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to an artificial intellectual stock ordering system for dealing with stock order processing, classified in class 705, subclass 36.
 - II. Claims 9-14, drawn to an artificial intellectual stock ordering method for analyzing, classifying, and assigning a grade to the news document, and ordering a stock to buy or sell via a second network classified in class 705, subclass 37.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has separate utility such as an ordering system dealing with a stock ordering process. Invention Group II has separate utility such as a method for analyzing, classifying, and assigning a grade to the news document, and ordering a stock to buy or sell via a second network. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3624

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicants' are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
